

```
// server.js
// This is the entry point - running
`node server.js` starts everything.

require('dotenv').config();
const express = require('express');
const cors = require('cors');

const authRoutes =
  require('./routes/auth');
const caseRoutes =
  require('./routes/cases');
const noteRoutes =
  require('./routes/notes');
const requireAuth =
  require('./middleware/requireAuth');

const app = express();

app.use(cors());           // allow
the React app to call this API
app.use(express.json());  // parse
incoming JSON request bodies

app.use('/api/auth', authRoutes); //
no auth required - this IS the login
```

```
// requireAuth runs before every
route below - you must be logged in
to reach them
app.use('/api/cases', requireAuth,
caseRoutes);
app.use('/api/notes', requireAuth,
noteRoutes);

app.get('/', (req, res) => {
  res.json({ status: 'Case Organizer
API is running.' });
});

const PORT = process.env.PORT ||
4000;
app.listen(PORT, () => {
  console.log(`Server running on
http://localhost:${PORT}`);
});
```
